

**XP3128 (A3-50 Sheets) XP3129 (A4-100 Sheets)**

**General Use**

Laser Dark is designed to be printed using a colour laser printer or copier and is suitable for application to both dark and pastel coloured garments. Laser Dark can also be used in conjunction with the Xpres cutter for cutting out colour logo's.

**Application**

Print onto the plain side of the transfer paper (Do not print in mirror image). Use single sheet feeding only from the bypass tray and set paper type to **thick** or **heavy stock**.  
After printing, position Laser Dark between 2 sheets of silicon paper (XP2028) and heat for 2 seconds under press to cure the toner to the coating. (Refer to the Ultragraphics manual for details on cutting with the Roland GX-24 cutter).  
Tear the corner of the paper and remove the excess material.  
Remove transfer and Position on the garment.  
• Cover the transfer with silicon paper (XP2028)  
• Press at 140°C for 20 seconds.  
• Pressure Medium/Heavy\*  
• Allow Transfer to cool then remove silicon paper.  
\* Medium/Heavy pressure is very important for high quality image transfer and washability.

**Washing**

- Always turn garment inside out before washing.
- Machine wash 40°C.
- Hang dry only.
- Do not use harsh or bleaching washing materials
- If ironing is required only iron inside out on reverse of the transfer.

The Sellers and Manufacturers maximum obligation shall be to replace any paper that has been proven to be defective. Neither the Seller nor the Manufacturer of Colour Trans paper shall be liable for any injury, direct or consequential, arising out of the use of, or inability to use this paper.
