

25/26

Welcome

If you've been searching for great quality fashion basics, you'll love what Vanilla offers. Our retail-inspired styles go way beyond simply being 'good enough'.

Our soft handle fabrics are developed and extensively tested to ensure they provide the optimum surface for decoration.

Side Seam Construction ensures an enhanced fit and ease of decoration whilst keeping garments from twisting.

All styles are fully rebrandable with adhesive or tear-out labels (even the care labels).

Vanilla is also ethically sourced and made with love and consideration for the environment.

So, if you haven't tried Vanilla yet, be assured that we've got the perfect base for your print.

Pant

Everything manufactured has an impact on the planet, from fabric production to dying, stitching to shipping. So, if you are mindful to minimise your footprint wherever you can, all Vanilla products are thoughtfully designed and ethically sourced. However, if 100% organic cotton is your thing, this is the perfect range for you!

Unlike some organic garments, Vanilla's organic range boasts 100% sustainable cotton, rather than a blend. This ensures an exceptional surface for both DTG and screen print decoration.

Organic Collection

Organic Cotton

Organic Cotton is a natural GMO free fibre which means the seeds have not been genetically modified. The production is grown without the use of chemical pesticides, fertilizers and insecticides. This encourages farmers to use natural methods like crop rotation to be able to keep the soil more fertile and healthy. A healthier soil means during floods, the soil can soak up and retain the water for longer periods during droughts.

Organic Cotton is also planet friendly as it uses less water than conventional cotton production. Due to most organic cotton being grown in areas that have higher rainfall, this means that farmers can rely on rain to water their cotton, instead of having to extract water from the ground which usually puts pressure on local and global water supplies.

Why Choose Organic Cotton?

For the Planet

When producing organic cotton, no toxic chemicals flow into the soil or any connecting rivers, lakes or seas. During production, any water used can be recycled and returned to the soil, rivers, lakes or seas without causing any harm. This is considered organic farming. It also has less impact on air pollution and uses 88% less water and 62% less energy than conventional cotton production.

For the Farmers

Due to organic cotton being grown without the use of chemical pesticides or fertilisers, it protects the well-being of farmers and their communities. According to data from the UN, an average of 200,000 people die from toxic exposure to chemicals used in standard cotton production per year across the world.

Benefits for Wearing Organic Cotton

Breathable

Due to organic cotton being a natural, breathable fibre, it will keep you cool and comfortable in warm weather since it doesn't trap heat and allows moisture to evaporate. It will also keep you insulated in cold weather.

Durable

Organic cotton is more durable than conventional cotton because organic cotton hasn't been processed with strong harsh chemicals which weaken and damage the fibres. Organic cotton fibres are also longer and have a stronger structure.

Biodegradable

Not only can organic cotton be recycled, but it's also compostable. Plants biodegrade and due to cotton being a plant it can break down back into the environment to be used by the soil.

Hypo-Allergenic

Due to organic cotton being processed with no harmful chemicals, it's better for your skin and for health. It's hypo- allergenic which means it won't cause irritation for people with skin issues or with sensitive skin.

Organic Range is GOTS Certified

The Global Organic Textile Standard is known for its respected certification and demanding criteria. GOTS ensure that environmental, ethical and social standards are met. Choosing a garment that has been GOTS certified ensures that the fibres of the raw material have been grown and produced in a non-harmful way, avoiding damage to the environment and to the health of the farmers. GOTS also regulate production to ensure fair trade and safe working conditions for the farmers.

Organic Cotton Tee

We believe this is the softest organic cotton tee you can buy. The perfect backcloth for DTG and screen printing!

This is a general guide only. Please see our website for individual garment technical specifications.

Vanilla clothing is made with love and total respect for people and the environment.

We believe in responsible design and only develop quality garments that are made to last.

All factories that manufacture Vanilla garments hold at least one of the following ethical audits – WRAP, BSCI or SEDEX - in fact most hold all three!

None of our garments contain any of the current substances of very high concern in accordance to European Regulation (EC) 2006/1907 – Reach Regulation.

All components used in our garments have been tested to Oeko-Tex Standard 100 and hold a current certificate testifying this fact.

We are committed to acting ethically, with integrity and are transparent in all business dealings. We dedicate ourselves to putting effective systems and controls in place to safeguard against any form of modern slavery taking place within the business or supply chain.

Our management team regularly audit all of our garment manufacturing facilities and key suppliers to these factories.

A full copy of our ethical statement is available at yourvanilla.com
